Amber, my schedule has shifted since I emailed, of course. Maybe we can just get on the phone tomorrow and figure something out? My cell is 781-296-6267. Let me know when we can connect.

Eric

>>>
>>> Jesse, I didn't realize you had contributed as a presenter to our classes in the past, that's awesome! Record keeping for the Asheville area hasn't been the best on our end, since the company hasn't had anyone based in Asheville to fulfill the outreach role previously. ;)
>>>
>>> We would be thrilled to have either of you, or Patrick, come present to our class this month. We have openings on Monday 12/4 and Thursday 12/7 at 12:30pm, or the following week Mon-Wed same time frame.
>>>
>>> We also have a few slots available for the next class that starts January 15th. Whatever you feel to offer is awesome. I would also be stoked to connect with members who would be interested in coming to share their experience or a project they are working on.Â

Overall, I'm looking to further solidify a relationship with Code for Asheville and TTS. I hope to see our students and alumni plugging into projects on a more consistent basis in 2018.

Let me know how I can accommodate you.

Thanks again!Â

Hi, Amber,

My apologies for not replying earlier ... it's been crazy days.

I'm the current captain of Code for Asheville (and, as Jesse noted, both he and Patrick are former captains). We would definitely love to support you by offering speakers as well as welcoming your students as part of Code for Asheville. Both Jesse and Patrick would be awesome for this and I'm happy to make time as well (I work for IT at the City of Asheville as a digital services architect and web developer).

Warm regards,

Eric

Hi Amber,

Thanks for your message! My name is Jesse Michel. I am the lead developer on StoryTell, the community stories platform.

My business partner, Patrick and I have both done multiple presentations to tech talent south (in the past we've done these at Base Camp AVL, a local co-working space, along with some other venues). Patrick and I are both developers who have served as co-captains of Code for Asheville in the past, and our company dedicates 20% of our time to community projects.

Typically we touch on some high-level philosophies in terms of becoming a web-development professional, as well as discussing the tools we use and our community work.

I know that Patrick goes OOO for the holidays after the 18th, so it would be great to set something up before then if we are shooting for December.

If not, we're always happy to pay a visit to the TTS students and present next year.Â

There are, of course, other members in Code for Asheville whom I am sure would be willing to present. If you'd like, I can put the call out for members who may be interested in presenting in December. I can send any takers your contact info. If it doesn't work out for December, you could have some contacts for the next go-round as well.

Thanks!

Jesse Michel

Hello,

I am writing to extend a Thank You for providing such great content in your newsletter and for the work you do in our community!

Do Code for Asheville members/organizers ever present at schools or learning institutions?Â

I work with Tech Talent South, a local coding bootcamp that has been hosting classes in Asheville for a few years now. I recently came on board as the Community Organizer for the school in Asheville after completing the Code Immersion course this Summer. I am working to help connect our students to the local developer community as well as provide opportunities for them to engage with meaningful projects locally.Â

We currently have a couple openings for special guest speakers to come present to our class this December. Do you know anyone in the Code for Asheville network who may be interested in connecting with us in this way? The students are in a Full Time immersive course and thus don't have a lot of time to attend Meetups outside of class time. I am sure that a simple presentation would help spur them to become involved in the Brigade once they finish their course in January.Â

Thanks again for your work and I look forward to speaking with you further.Â

Best,

Code for NC Meeting 12/9/2017
Are you interested in helping shape the ways that North Carolina brigades collaborate and support both each other and communities without

brigades?

Representatives from brigades across the state will gather in Greensboro on Saturday, December 9, from 10am to 3pm. I will be going and would love to have other Code for Asheville members accompany me. I'm happy to share transportation. If interested, email me at Eric.Jackson@DemocracyApps.org.

StoryTell Asheville - Latest Update

We first outlined the idea behind our new stories collection platform in our September 26 newsletter. Since then Jesse Michel has built a minimal version of the project that we can try out for our first couple projects.

The project, which we are tentatively calling *StoryTell Asheville,Â* is an experimental one, and we are still exploring how we can use the platform for ourselves and or other communities.

StoryTell Asheville is a site for collections of stories about and by communities, with a focus on the voices of those who have traditionally not been heard and of those who are working to empower them. Our hope is that it will serve as a platform for celebrating Ashevilleâ€™s delightful diversity, bringing attention and action to community needs, and helping break down the walls that separate us from one another.

The structure of the site is quite simple, consisting of stories and projects, presented in a professional, presentation-ready format.

A story is a narrative contribution to a project from a single person in the form of text or video, just like a Facebook or blog post. No registration is required to post a story, but every story will be reviewed before posting to ensure that it aligns with the purpose of the project and obeys our community code of conduct.

A project is a set of stories that is collected by a community or organization for some purpose, represented by a call to action on the main project page. Projects may be used for a variety of purposes - we are deliberately leaving this open for now to allow exploration. Our only requirement is that projects align with the basic principles above. Here are a few examples that illustrate the range of possible uses:

- Collect interviews with local homeless individuals to put human faces on an otherwise abstract problem
- Prepare for a hackathon to introduce participants to the stories of people they will be helping.
- Capture stories from participants from an eventÂ like a hackathon or a protest.
- Collect stories from two distinct communities in conflict as a way of humanizing one another.
- Use storiesÂ as a way for a community to collectively come to an understanding of the issues they face.

To test out the platform before making it available to other communities, we will use it to collect and display stories about Code for Asheville participants. Our plan is to feature them on the Code for Asheville website to give potential new members and partners a sense of who we are and how they might fit in.Â Please join us at our December 14 Community Night to start collecting stories.

News From the Network

Datapalooza Winner - CivicRise

NC Datapalooza is a competition designed to catalyze positive community and economic impact through the use of open data. This year's competitionÂ kicked off at CityCampNC in September, where Code for Asheville members contributed to that day's prizewinner project, *Are We Represented?* That project made it to the final round on November 13, but was edged out by *CivicRise*, a smartphone app that supports collective civic action.

Check out the details of the competition finaleÂ here.

And if you are interested in helping with ongoing work with the *Are We Represented?*, a project to shed light on how well local and state elected bodies reflect the demographics of the communities they represent, reach out to Eric - a cross-brigade team will be continuing the project after the holiday.

Have a Story to Share?

We'd love to have your contribution. You can write something up about a Code for Asheville event or share something else going on in the civic tech world. Email us at code4asheville@gmail.com.

Upcoming events

12/14 Monthly Community MeetupÂ

Our next Community Night will be on Thursday, December 14, 2017 at 5:30pm. We'll be working on StoryTell Asheville. The meeting will probably be at the Dr. Wesley Grant Sr. Center, but we still have to confirm that. Details will be in the next newsletter and on meetup.

Community nights occur on the second Thursday of each month. The location rotates among differentÂ Asheville community centers.

12/12 Brigade Planning Meeting

Our next regular planning meeting will take place on Tuesday, December 12 at 5:30pm at the Battery Park Book Exchange. RSVP here or just stop by.
