Subject: Permit #18-00011 35 Mineral Springs Road

I am with the Cross Connection Control Office at the City of Asheville Water Department. I needed to let you know that there is a hold on your permit at the above listed address for backflow non-compliance. This hold will not keep you from starting the work listed, but will hold the Certificate of Occupancy from being issued if the requirements are not met.

We are not tracking a backflow assembly at your site and this will need to be corrected. If you are aware of a backflow assembly already being in place, we will simply need to come by and inspect this. If there is not one, we would like to meet with you and discuss what will be needed and where it can be installed. We will release the hold on your permit as long as we are able to open a line of communication to discuss the timeline for this commercial water use requirement. Please contact our office at your earliest convenience.
