Wanda:

FYI We appreciate the challenges and trust that we can work together to keep the project on track.

Please let me know if you or your team have any questions. Cathy Ball and I have not connected today, but I believe she is reaching out to Jon C. too.

Gary

Gary,
To summarize this issue:

1. 5/11 - DSD staff made contact with contractor the morning after your initial email to me to put them on notice about the need to apply for an Afterhours Permit.

2. This permit allows work outside the allowable construction hours of 7:00 a.m. and 7:00 p.m. Monday through Saturday; it does NOT allow the creation of noise disturbances. Prohibiting noise from the operation of machinery and other vehicles, sirens, whistles, etc. and the erection (including excavating), demolition, alteration or repair of any building or other structure within 500 feet of a residential district as established pursuant to the city zoning ordinance, other than between the hours of 7:00 a.m. and 7:00 p.m. Monday through Saturday, except by permit from the building inspector when, in his opinion, such work will not adversely affect other persons. Following the issuance of such a permit, if the building inspector shall determine that the building operations are adversely affecting others, he shall be authorized to modify or revoke the permit. The building inspector may permit emergency work in the preservation of public health or safety at any time.

3. 5/12 - Contractor for the concrete pour applied for Afterhours Permit. DSD Building Safety staff is currently reviewing and will be issuing the permit today, 5/13, for afterhours work beginning today.

Schedule
May 13-May 31
M-F - 7:00AM-9:00PM
Saturday's only (14th, 21st, 28th) - 1:00AM - 7:00PM

DSD protocol is to issue Afterhours Permit for no longer than 1 month (Civic Ctr, AC Hotel, etc...). The County project will need to apply for another Afterhours permit on June 1.

Work associated with concrete pours of this level typically follow a tight schedule and as such we can anticipate when we need to issue Afterhours permits. If at any time we begin to get neighbor complaints we require the applicant to meet with us and we discuss next steps (i.e.; neighbor meetings, notifications, adjusted hours, revoked permit, etc...).

The original notification the contractor provided to the neighbors is incorrect in that it states the afterhours work will be occurring from 5/14-12/31. That may very well be their timeline but we have only approved afterhours work to occur until May 31.

Any questions please let me know.

Jason

Jason:

Have we reviewed and support as reasonable and necessary? Please consult with our legal staff if necessary to confirm code provisions latitude and responsibility of staff.

Dear Mayor, Council, and interested parties,

I found the attached notice on my car window this afternoon. After assurances from some of you that things would improve, it appears they have taken a turn for the worse. Does the County get special permission to break the city noise ordinances for 7 months? Weekly 1:00 am wake ups ? Cement trucks and crane noise.

Very discouraging. Is this happening at the other 3 "crane sites" downtown or just the County site?

I will appreciate any efforts to limit this to defined daytime hours of 7:00 am - 11:00 pm per the ordinance.

Thanks for your consideration,

Jon Kemske
