Deeply skeptical that this study will have the impact on near and long-term cost management which our citizens so desperately need. I would like to meet Thomas Wieczorek asap. Thanks

Best regards,

Dave Gilroy | Commissioner
Town of Cornelius

Subject: Public Safety Analysis

Mayor and Board,

Please find attached revised scopes for the public safety analyses for the Fire and Police Departments. I recommend we move forward with these. Please recall our previous discussion where we identified the below core goals of the analyses. To save you time, we've highlighted the key relevant sections of the scopes that address the goals. Performing both studies is a cost of ~\$74,000; if the consolidation study is performed, that will cost Cornelius

an additional \$3,000 (the cost for the other towns would be \$15,000 each).

Fire core goals: Evaluate and recommend appropriate staffing levels for the present and future; Identify and recommend capital needs for appropriate capital planning (apparatuses, station); Identify viable revenue sources; Evaluate and determine the feasibility of successful consolidation with Huntersville and Davidson departments

Police core goals: Evaluate and recommend appropriate staffing levels for the present and future

I've had positive conversations with Anthony and Jamie regarding performing a joint 3-town consolidation study. Both see the value in performing the consolidation study. I've committed to present them with the Fire scope so they can discuss with their respective Town Boards to gain their approval for the consolidation study; but, before I do, I want to receive the green light from you that you are comfortable with the scopes. Please provide your concurrence with the scopes so we can get moving on this as fast as possible.

Thanks.
