Hi Keith!

Happy New Year!

How are you? How are Pisgah and Mitchell?

I finally have a venue, date and time for the Asheville premiere of The Cat That Changed America:
UNC Asheville, Saturday, March 24, 7-10PM.

Beth Pratt-Berstrom, California Director, National Wildlife Federation, P-22 expert and author of When Mountain Lions Are Neighbors and Joel Schulman, PhD., Co-founder Poison Free Malibu, will be our special panel/Q&A guests along with one or more local wildlife experts.

I will get you the posters/flyers as soon as they are printed next week.

It's happening!

Best wishes,
Diana

Hello again,

I apologize if I did not send these before but... introducing P-22.

<image001.png>

<image002.png>
poisoned

healthy again after treatment

As I'm sure I mentioned, I am the former Managing Director of the Animal Rights Foundation of Florida, the largest animal advocacy organization in Florida, and the former Development Director for Save the Chimps, the largest primate sanctuary in the world. I have produced humane education campaigns targeting adults and children on a wide variety of issues for thirty years. The only difference here is that I am working from/starting a new organization and the audience is a work in progress, as we discussed today.

My intention for including the Nature Center is to hopefully bring the center attention and new visitors.

Thanks again for meeting with us today.

Kind regards,
Diana
