Good Morning Mr. Forbes,

Our IT Department reports that they do not have the capacity to convert .pst files to the .mbox format, but that they found several options to make the conversion from your Mac. Below you may find instructions and/or links for three of those options.

Cordially,  
Alex Carmichael

Option 1

Apple mail and Entourage mail both work using a different file format from Outlook saves the data/messages using .pst extension whereas Apple mail and Entourage support file formats such as .mbox files.

Save the file to a location accessible using your mac pc

Get Mail Monkey from app store

Run the application and click on open pst file

select the pst file saved earlier and on the top left corner click save

Here you have all your data converted into apple mail format (.mbox)

---

Option 2

I spoke with our IT department. They have the capacity to convert data files from .mbox to .pst and are investigating if they can do the reverse. I will keep you posted as I know more.

We also tried to open this on one of our writers' pcs and the files still won't open, so please adjust the format to something more commonly readable. While it's not perfect, pdf has been used before to fulfill some of these requests for emails.
