Hi Catherine

Thank you for taking my call today.

The GO-4 is a compact three wheel street legal unit that has been in operation since 1990.

Its main benefit is its overall compact size, at 52 inches wide it has a very small foot print in traffic, however very safe due to its 2.5" steel rollbar chassis.

Its tall cab and double sliding doors allow operators to jump in and out very easily on either side. Primarily sold to parking enforcement municipalities, as well as some police departments. Our customers range from NYPD to SFMTA, both of these customers have 250+ units in the fleet.

I am attaching some info for your review. Please let me know if this is potentially a fit for any of your operators.

--

Thank you,

Tabitha Baete
