NEW! Mobile Parking Enforcement Solution to be launched at IPI

Maximize the overall profitability of your parking operations

See How

The CitySync Mobile Parking Enforcement Solution is a complete automatic license plate recognition (LPR) solution. Using our LPR mobile system will increase the productivity of enforcement officers and protect against ticket fraud, permit swapping, and serial scoflaws.

The Autoscope Mobile software is a user-friendly yet robust self-containing platform that improves efficiencies and captures more revenue results. It's user-friendly yet robust self-containing platform is fully functional and interactive; providing alerts, logs and the ability to analyze data in the form of charts and graphs.

For more information about the newest addition to our CitySync product line, visit us at **IPI booth #101** or at **imagesensing.com.**
