

Subject: [t2users] 3M/Federal exiting the parking business

I'm interested to know if there are any fellow T2 customers on this list serve that currently use Federal APD equipment. If so, are you aware of the recent announcement that 3M - who recently acquired Federal APD - is exiting the parking business altogether early next year? Also I'm curious if anyone else is using Scannet and/or considering using 3Ms Element solution for access and revenue control. Those plans could be up in the air if the announcement below holds true. Any feedback or responses would be great.

Below is a link to the article.

Subject: [t2users] Extended Permit Renewal

Looking for comments from anyone that are extending permits (renewing) but do not have an LPR system.

- How do you go about using the same permit?
- Are you sending them a sticker or bar code that identifies they are renewed?
- Are officers scanning each permit?
- Do you find many in violation as it's the same permit?

Any feedback on what has worked well for you would be much appreciated.

Thanks you.
