Just curious, so does this mean that the camera is going to be moved to the Col Pay lot so we can view it and zoom in and out to try it or it will be put here at Avent Ferry? Thanks

Brenda

All,

This will not happen until next week and I will let you know by email before we change the camera. I have attached a view from the camera just as a example of how it looks. Please let me know if you have any issues with the view you will get from this camera so we can address your needs. This is a broad view and the camera can be adjusted to narrow the view.

Thanks

Mike

Good afternoon

I spoke with Ronnie and we are in agreement that wouldn't be a problem and I suggest that we use the Col Pay lot Middle lane if possible to try. That is the hardest to see. Thanks for keeping me informed!

Ronnie / Brenda,

We are currently testing a new style camera that will replace the LPR cameras in the decks. Is it possible that next week we replace 1 of the LPR cameras in a deck with this new camera? I would like to finish the preliminary tests here at Magnolia.

Brenda,

Can you provide us with the approximate times and which cameras had this happen?

I'm going to do a little bit of work here in the next few minutes and you may see a camera here or there go down and come back up as well as whole groups of cameras.

Just wanted to let you know that the problem with the yellow error "video failure - archiver unreachable" is not really fixed. It was better for a few days so Brenda thought it was fixed. But later in the week it started again.

Thanks,
Ronnie

Good Afternoon all

I wanted to give a quick update on camera's and intercom's. The yellow lost video feed seems to have disappeared and problem seems to be fixed at this time for the Col. and Poulton pay lots.

Will came over this afternoon and changed the tabs in the intercom to read the correct name/title. He is going back to his office to change the names on the camera's themselves and will move all the layouts to the bottom of the navigation tree for easier access to everyone without having to open up a branch, scroll down and find the layout to open. Thank you so much WILL !!!!!!!!

Any questions, please let me know. Thanks again Will for all the work you have put into this.
