Jeremy, the state of Missouri does not use the letters O, I and Q on license plates. When used on personalized plates the system automatically converts these to numbers. Hope this helps

Subject: License Plates & LPR

Good Afternoon everyone:

Here at Colorado State we've gone to LPR enforcement in the last year for our Permitted lots. One of the issues, and a thorn in our side, has been the accuracy of plates read by the LPR system. In particular are the license plates using 0 and 0 (zero). So my question before I task one of my Enforcement Officer's with calling all 51 State DMV's, is; Does anyone have a list of States and what their standards are regarding 0's and 0's.. I know here in Colorado a plate with a character shaped like an oval is a 0 zero, but if it looks like a square with the corners cut off that's an O. This is the kind of info I'm looking for from all the other states, or if a state only uses 0's or only O's that would be good to know for training and our sanity. Any help is appreciated even if you only have the standards in your particular state. Thanks ahead of time, and happy Easter.
