We use T2 Flex to sell the permits and Genetec LPR. They work seamlessly together. We enforce commuter zones, residential, meter and time limits by LPR.

It's not as simple as drive and let the system do the work for you, but its pretty close. Feel free to call me if you want to talk more.

Subject: LPR For Residential Parking

Greetings All.

Does anyone use LPR for enforcement of a residential permit parking zone/area? If so, what do you use and how do you go about enforcing it?

Thanks

Chris Quick
