Hi, councilmembers,

After a violent raid at Aston park, I'm writing to ask you to end evictions of the camps where houseless community members are staying, & especially to end police involvement. Please consider immediate alternatives to solving the problems called in that have spurred this change in previous pandemic policy sanctioning camps on city property (providing & maintaining portapotties at camp sites, providing hand washing stations, etc.) & more long term prioritize efforts to make less people houseless, & practical stop - gap measures for safety for people experiencing homelessness right now.
